

State of Science for the Bay-Delta System

Organizational Structure and Process

Independent Science Board (ISB)

Process oversight and final product/report review

Editorial Board

Provides process and product oversight, content development guidance, technical content review

- Lead Scientist
- ISB representative
- Science Advisor
- Managing Editor

Managing Editor

Works closely Chapter Editors to communicate goals/expectations/focus of report to Chapter Authors; works closely with Chapter Editors and the Editorial Board throughout the writing process to ensure a synthetic final product.

Editor

Helps develop writing guidelines for report—style, convention—editorial consistency, final packaging

Chapter Editors

Responsible for guiding chapter authors in content development. Work closely with Managing Editor and Editorial Board to ensure that each chapter provides information that is both relevant to upcoming management decisions and scientifically and technically sound. Chapter Editors will be Science Program technical staff to ensure in-house oversight of report development.

Chapters

1. System setting
2. Ecosystem Management with emphasis on water operations
3. System Response to management
4. Outcomes, Indicators, Response Detection
5. Management tools and decision making
