

## Documentation Overview

There are a series of documents intended to provide applicants with the basic information needed to submit a proposal for this solicitation. This document provides an overview of CALFED and the Science Program;

- describes the three CALFED priority topic areas which form the broad information needs this solicitation is intended to address ;
- lists examples of potential scientific study topics and approaches that would address these broad information needs;
- explains the criteria and process that will be used to evaluate and recommend proposals for funding; and
- provides information on the application process and how to obtain technical assistance.

Additional information is provided in the six attachments to this document.

- [Attachment 1](#) describes scientific topics and potential study examples in more detail;
- [Attachment 2](#) describes the selection process and the criteria that will be used to evaluate proposals;
- [Attachment 3](#) describes the general requirements with which funded proposals will need to comply;
- [Attachment 4](#) provides instructions for preparing proposals;
- [Attachment 5](#) provides a sample proposal; and
- [Attachment 6](#) are the basic terms and conditions for State-funded Science Program grants.
